

Golden Isles CO®

Golden Isles CO® Fluff Pulp For Feminine Care

GP Cellulose is dedicated to producing innovative, quality products delivered with assurance and the support of premier technical services.

Golden Isles CO® fluff pulps are made from a coarse, bulky, long fiber and are used in a variety of absorbent applications - offering optimum fluid retention, liquid distribution (wicking) and pad integrity.

As a responsible company, our goal is to manage our actions and resources with proper regard for the rights of others by leveraging sustainability to create value for our customers and consumers.

Benefits from using Golden Isles CO® Fluff Pulp for Feminine Care Products*

Thinner Profiles For Today's Ultra-thin Market

- When compressed to higher density this pulp retains softness and flexibility providing an option for creating ultra-thin products
- Thinner, more conformable products translate to improved comfort and performance in use

Enhanced Fluid Management

- At higher density, pads may have increased dimensional stability which may result in better fluid transfer and wicking from body resulting in improved dryness
- Emboss retention may help channel fluid from point of insult to achieve lower rewet and better leakage control

Supply Chain Savings

- Smaller packages and increased package counts may be realized due to the possibility of maintaining conformability and absorbent performance at higher density

Golden Isles CO® fluff pulp is available in an untreated and treated version.

*Characteristics and potential benefits of using Golden Isles CO® fluff pulp are determined based on laboratory tests and actual results depend on commercialization by customers.

Golden Isles CO®

适用于女性卫生用品的 Golden Isles CO® 绒毛浆

GP Cellulose 致力于生产创新、有保证的优质产品，并提供专业的技术服务。

Golden Isles CO 绒毛浆由粗重、蓬松的长纤维制成，可应用于各种吸收性产品——具有卓越的液体保留率、液体分布（吸附）均匀，且能保持吸收垫体的完整性。

作为一个负责任的公司，我们的目标是规范自身行为、管理好资源并尊重他人的权利，通过强化可持续性为我们的客户和消费者创造价值。

使用适用于女性卫生用品的 Golden Isles CO® 绒毛浆带来的益处

更薄的外形适用于当今的超薄市场

- 当压缩到更高密度时，这种纸浆仍可以保留柔软性和弹性，提供了打造超薄的产品选择
- 更薄、更柔顺的产品转化为在使用中更高的舒适度和性能

强化液体控制

- 密度更高时，衬垫可能增加尺寸稳定性，这会使得液体输送能力更高，更好地吸收体内流出液体，从而改善干燥度
- 压花保持性或将有助于疏导体内流出的液体，降低回渗率，更好地防止渗漏

供应链资源节约

- 由于能够在提高密度的同时，保持柔顺性和吸水性，因此可以实现更小的包装和更多封装件数

Golden Isles CO® 绒毛浆提供未处理级别和处理级别的产品。

*使用 Golden Isles CO® 绒毛浆的特性和潜在优点是基于实验室测试和客户实际使用结果。
